HANA AI Whitepaper

1. Introduction

HANA AI is a revolutionary cryptocurrency project that combines AI, MEME culture, Play-to-Earn (P2E) gaming, and decentralized finance (DeFi). Our mission is to create an engaging, community-driven ecosystem where users can earn, trade, and participate in a thriving blockchain-based economy.

2. Vision & Mission

Vision

To be the leading AI-powered Play-to-Earn MEME coin and Solana-based decentralized exchange (DEX), providing an advanced trading experience while leveraging blockchain and artificial intelligence innovations.

Mission

• Integrate AI-driven utilities within the ecosystem.

• Provide a seamless gaming experience where users can earn rewards.

• Build a strong and engaged community through MEME culture.

• Ensure long-term growth and sustainability through strategic partnerships, exchange listings, and influencer marketing.

• Create an advanced DEX (HANA DEX) that enhances Solana trading with AI-powered analytics.

3. HANA AI Tokenomics

We have a next-level strategy that could make HANA AI even stronger. Here's a pro strategy for tokenomics that balances growth, liquidity, and investor trust.

🚀 *Pro-Optimized Tokenomics for Long-Term Success*

Allocation	Percentage	Strategic Purpose
◈ Presale	35%	Public sale on PinkSale, fully audited and KYC verified.
◈ Liquidity (DEX & CEX)	32%	24% locked for DEX liquidity (Raydium), 8% reserved for future CEX listings.
◈ Game Rewards	12%	Play-to-Earn incentives, released over time.
◈ Unlocked	6%	Available for trading, partnerships, and growth.
◈ Staking & Holder Rewards	5%	Incentivizes long-term holding and staking.
◈ Marketing & Development	5%	Used for influencers, community engagement, and project growth.

💡 *Why This Strategy Works Best:*

☑ ⬙ Ultra-Strong Liquidity (32%) → Prevents high volatility and builds confidence.

☑ 🔒 Reduced Immediate Sell Pressure → Only 6% unlocked ensures price stability.

☑ 🔥 Staking Boost (5%) → Encourages long-term holding and passive income.

☑ 🎮 Sustainable Game Rewards (12%) → Still attractive but not oversized (prevents oversupply).

☑ ☑ Optimized Marketing Budget (5%) → Focus on powerful influencer promotions.

🔥 BONUS STRATEGY: HANA AI STAKING POWER-UP

• Instead of just game rewards, let users stake tokens for passive income.

• Offer higher APY for long-term stakers (3 months, 6 months, 1 year).

• This reduces sell pressure and boosts demand for HANA AI tokens over time.

This setup makes HANA AI more attractive, liquid, and community-driven. 🚀

4. HANA DEX - Next-Gen Solana Trading Platform

HANA DEX is an advanced decentralized exchange built exclusively for the Solana blockchain. It aims to offer a superior trading experience with the following features:

Key Features:

• AI-Powered Rug Check – An advanced security scanner that analyzes contracts for potential rug pulls or malicious activities.

• Real-Time Market Data – Provides traders with live Solana-based token analytics, similar to Dexscreener.

• Influencer Insights – Integrated Telegram KOLs, X KOLs, and YouTube KOLs to highlight trending tokens.

• Smart Order Routing – Optimizes trading by finding the best available prices across Solana liquidity pools.

• DEX Aggregation – Combines liquidity from various Solana-based DEXs for deeper liquidity and better pricing.

• AI Trading Bots – Automated AI-driven bots that assist traders with market analysis and optimal trade execution.

HANA DEX will serve as a one-stop trading hub for the Solana ecosystem, providing a secure, data-rich, and AI-enhanced trading experience.

5. Presale Details

• Platform: PinkSale.finance

• Verification: KYC Verified, DOXED, Smart Contract Audit

• Soft Cap: 50 sol

6. Roadmap

Phase 1 - Project Initiation

• Concept Development

• Team Formation

• Smart Contract Deployment

• Community Building

Phase 2 - Presale & Marketing

• Presale on PinkSale

• Influencer Marketing (YouTube, Telegram, Twitter)

• Community Engagement Campaigns

Phase 3 - Exchange Listings & Expansion

• Fast-track listing on CoinMarketCap (CMC) & CoinGecko

• Listing on Tier-1 and Tier-2 exchanges

• Continued partnerships & game development updates

Phase 4 - Play-to-Earn Game Launch & HANA DEX Beta

• Beta Release of P2E Game

• NFT & AI Integration

• Staking Features

• HANA DEX Beta Testing & Community Feedback

7. Marketing Strategy

• Influencer Collaborations – Top YouTubers, Twitter, and Telegram KOLs

• Community Airdrops & Giveaways

• Referral & Staking Rewards

• Strategic Partnerships

8. Security & Transparency

• Smart Contract Audit before presale

• Transparent team with regular updates

• Community-driven governance features

9. Conclusion

HANA AI is more than just another MEME coin; it's a powerful blend of AI, gaming, and decentralized finance. With HANA DEX, we aim to redefine Solana trading by integrating AI-powered security, real-time analytics, and influencer-driven insights. Our team is committed to delivering long-term value through strategic marketing, partnerships, and continuous innovation.
